Python SQL Docker

SUMMARY

Built internal services for a fictional operations team, with an emphasis on clear documentation and reliable releases.

EXPERIENCE

Maintained scheduled data imports and investigated failed tasks with the support team.

Documented deployment steps and recovery procedures so colleagues could maintain the service.

Reviewed changes with teammates and added checks for invalid input before each release.

PROJECT

Prepared a small service for a container orchestration platform during a supervised training project.

Fictional example for checking text extraction. Not a real applicant or hiring result.
